

Newsletter 13

April 2012

In this newsletter, we focus on recently newly developed products.

Toyota Land Cruisers for the mining industry.

In this issue, we will draw your attention on the delivery of a fleet of Toyota Land Cruisers, semi-long, 5-doors with hardtop, fully equipped with many safety features.

Safety First. The mining industry works with extremely high requirements regarding safety and security for its employees. Safety and visibility are the keywords.

There are special facilities installed on the exterior, such as reflective striping, whippy flag, rotating beacon light, heavy duty mud guards, bull bar, winch, etc. The interior is heavily reinforced with a roll bar structure. The vehicles are also equipped with a full set of Codan communication equipment.

Specialist work

Transmotors knows the specifications and can make you a custom offer according to your needs and requirements.

Transmotors BV International Transport Solutions

Would you like to know more concerning our transport solutions? Then, kindly contact our sales representatives Barry Beard, Peter Kreukniet and Ton Ottevanger, or go to: www.transmotors.nl

Transmotors
grows,
Transmotors
flourishes.

Our workshop, aswell as our warehouse for spare parts and accessories have doubled in size and we now have new offices.

And thanks to your support and confidence, we are still growing. Our turnover has been developing rapidly, especially in the production of special conversions of 4WD vehicles for the industrial sector.

So, we can again prove our motto: With us, time and quality make one ...!
